Notes

- (1) A class accumulation shares, net of fees priced at midday UK time, net dividends reinvested. Source: Valu-Trac Investment Management Ltd.
- (2) MSCI World Index in Sterling, net dividends reinvested, priced at close of business US time, source: MSCI Inc. The MSCI World Index is a generic portfolio of global equities across all sectors and, as such, is a fair comparison given the Fund is also global and sector agnostic.
- (3) iBoxx GBP Gilts Index, source: Refinitiv.
- (4) UK Pound Sterling Overnight Index SONIA, source: Refinitiv.
- (5) A (retail) class AMC 0.9% / I (institutional) class AMC 0.7%. (I-class for sums over £1m or at manager's discretion).
- (6) This figure will reduce if the fund increases in size: £30,000 of fixed costs over £10m = 0.30% but only 0.03% over £100m, for example.
- (7) The fund normally only buys and sells positions once a month to keep trading costs as low as possible.

The investment objective of the Fund is to provide capital growth over the medium to long term. The Fund will aim to meet its objectives by employing two primary investment techniques:

1. True diversification which may include exposure to equities, fixed income, commodities, real estate and infrastructure in different jurisdictions throughout the world, primarily using Exchange Traded Funds.
2. Formula-based trend following.

Monthly Commentary (August 2021)

At the beginning of the month we entered a long position in USD-denominated Corporate Bonds for the first time since November 2020 and in GBP Corporate Bonds for the first time since April of this year.

At the same time, we sold out of our core and Asian emerging markets positions given recent falls in those markets as highlighted in these pages last month. Happily we took a decent profit in both, notwithstanding the recent correction. This left the fund with long positions in 18 of our 24 silos.

August is almost always a low volume and volatile month in financial markets. With the northern hemisphere on holiday there is a great deal less trade than in many other months of

the year. This can often mean it is one of the worst-performing times of the year. Happily, August 2021 saw many financial markets do reasonably well. As a result, the fund added 1.5% through the month, taking our Year To Date performance to 5.4%.

September tends to be a difficult month for stock markets too so we shall see how things unfold as market participants come back from the beach and grapple with the last third of the year.

Key Risks

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
a wide selection of Exchange Traded Funds which themselves own many hundreds of underlying assets.
 - Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments. The Fund aims to mitigate this risk by investing in all major asset classes in many geographic regions and owning assets which are often negatively correlated.
 - Concentration Risk: The Fund seeks to minimise concentration risk by owning
a wide selection of Exchange Traded Funds which themselves own many hundreds of underlying assets.
 - Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. The Fund invests nearly exclusively in large, liquid ETFs so liquidity risk should be significantly lower than in a more conventional actively managed fund investing in single assets.
- For full details of the Fund's risks, please see the [prospectus](#) which may be obtained from the Fund's [website](#).
