# VT PEF Global Multi-Asset Fund

(VT PEF GMAF)

The investment objective of the Fund is to provide capital growth over the medium to long term. The Fund will aim to meet its objectives by employing two primary investment techniques:

- True diversification which may include exposure to equities, fixed income, commodities, real estate and infrastructure in different jurisdictions throughout the world, primarily using Exchange Traded Funds.
- Formula-based trend following.

# Performance (% return)

	Dec 2023	2023 YTD	*Since incep.	Q4/21 - Q3/22	Q4/20 - Q3/21	Q4/19 - Q3/20	Q4/18 - Q3/19	Q4/17 - Q3/18

<sup>\*</sup>September 2017 was only a partial month, as the fund was launched on the 25th September 2017. Past performance is not necessarily a guide to future performance. Source: Valu-Trac Investment Management Limited

### **Notes**

- (1) A class accumulation shares, net of fees priced at midday UK time, net dividends reinvested. Source: Valu-Trac Investment Management Ltd.
  (2) MSCI World Index in Sterling, net dividends reinvested, priced at close of business US time, source: MSCI Inc. The MSCI World Index is a generic portfolio of global equities across all sectors and, as such, is a fair comparison given the Fund is also global and sector agnostic. iBoxx GBP Gilts Index, source: Refinitiv.

- UK Pound Sterling Overnight Index SONIA, source: Refinitiv.

  A (retail) class AMC 0.9% / I (institutional) class AMC 0.7%. (I-class for sums over £1m or at manager's discretion).

  This figure will reduce if the fund increases in size: £30,000 of fixed costs over £10m = 0.30% but only 0.03% over £100m, for example. (7) The fund normally only buys and sells positions once a month to keep trading costs as low as possible.

# **Monthly Commentary (December 2023)**

Arguably the key theme of 2023 was the moderation of inflation, with US CPI at 3.14% compared with 7.11% a year earlier and UK CPI (for November) down to 3.9% from 10.7%. Financial markets have, therefore, anticipated a lower interest rate environment which is favourable for risk assets.

The GMAF's trend following methodology thus prompted the acquisition of ten positions during the month as recorded in the table below. The fund ended 2023 with just over 65% of our NAV invested and appreciated by 2.1% during the month.

The big equity indices had another very strong year, with the S&P500 up 24.2% and the MSCI World not far behind in USD terms (given the US accounts for nearly 70% of that index). We are long on record espousing the merits of those kinds of more "aggressive" investments alongside our more "defensive" fund (as a potential alternative to more conventional bonds for example). There are many concerned about concentration in equity performance with it almost all coming from "the magnificent 7" tech stocks. As ever, our view is that regular monthly investment into the right mix of assets over long periods of time can mitigate such concerns.

Buy	<b>Position</b>	<b>Trades</b>
-----	-----------------	---------------

- Equity / Developed Large (Europe ex. UK)
- + Equity / Developed Large (Japan)
- + Equity / Developed Large (UK)
- + Equity / Smart Beta (World Min Vol)

### **Key Risks**

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments. The Fund aims to mitigate this risk by investing in all major asset classes in many geographic regions and owning assets which are often negatively correlated.
- Concentration Risk: The Fund seeks to minimise concentration risk by owning

- a wide selection of Exchange Traded Funds which themselves own many hundreds of underlying assets.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. The Fund invests nearly exclusively in large, liquid ETFs so liquidity risk should be significantly lower than in a more conventional actively managed fund investing in single assets.

For full details of the Fund's risks, please see the <u>prospectus</u> which may be obtained from the Fund's <u>website</u>.
